PERMANENT MISSION OF THE PEOPLE'S REPUBLIC OF CHINA TO THE UNITED NATIONS

CMS (2023)

The Permanent Mission of the People's Republic of China to the United Nations presents its compliments to all Permanent Missions to the United Nations and, with reference to an event on human rights situation in Xinjiang, China, scheduled for September 19, launched by the Atlantic Council, Human Rights Watch and Amnesty International, has the honor to express our resolute opposition to this event and strongly recommend your mission NOT to participate in this anti-China event.

It's clear to all that the co-sponsors are notorious anti-China organizations. They are obsessed with fabricating lies and spreading malicious disinformation about Xinjiang with no respect for truth, and are plotting to use human rights issues as a political tool to undermine Xinjiang's stability and disrupt China's peaceful development.

The issues related to Xinjiang are not about human rights. They are about countering violent terrorism, radicalization and separatism. Thanks to strenuous efforts, there has been no violent terrorist incident in Xinjiang for over six consecutive years. The current situation in Xinjiang is at its best in history with social stability, high-quality economic growth, full victory in poverty alleviation, notable improvement in people's livelihood, greater solidarity among all ethnic groups and harmony among different religions.

In recent years, nearly 100 countries voiced their support in different ways for China's policy on governing Xinjiang and opposition to interference in China's internal affairs at multiple international occasions including the UN human rights council and the Third Committee of UNGA general assembly.

China attaches great importance to the promotion and protection of human rights and has achieved significant progress with tireless efforts. Crafting conspiracies and plots with Xinjiang-related issues will not stop the pursuit of a better life by people of all ethnic groups in Xinjiang or hold back China's development. We reject any wrongful act of interfering in China's internal affairs with the excuse of human rights.

The Permanent Mission of the People's Republic of China to the United Nations avails itself of this opportunity to renew to the Permanent Missions to the United Nations the assurances of its highest consideration.
