

December 9-16, 2024

N=800 Registered Voters Nationwide

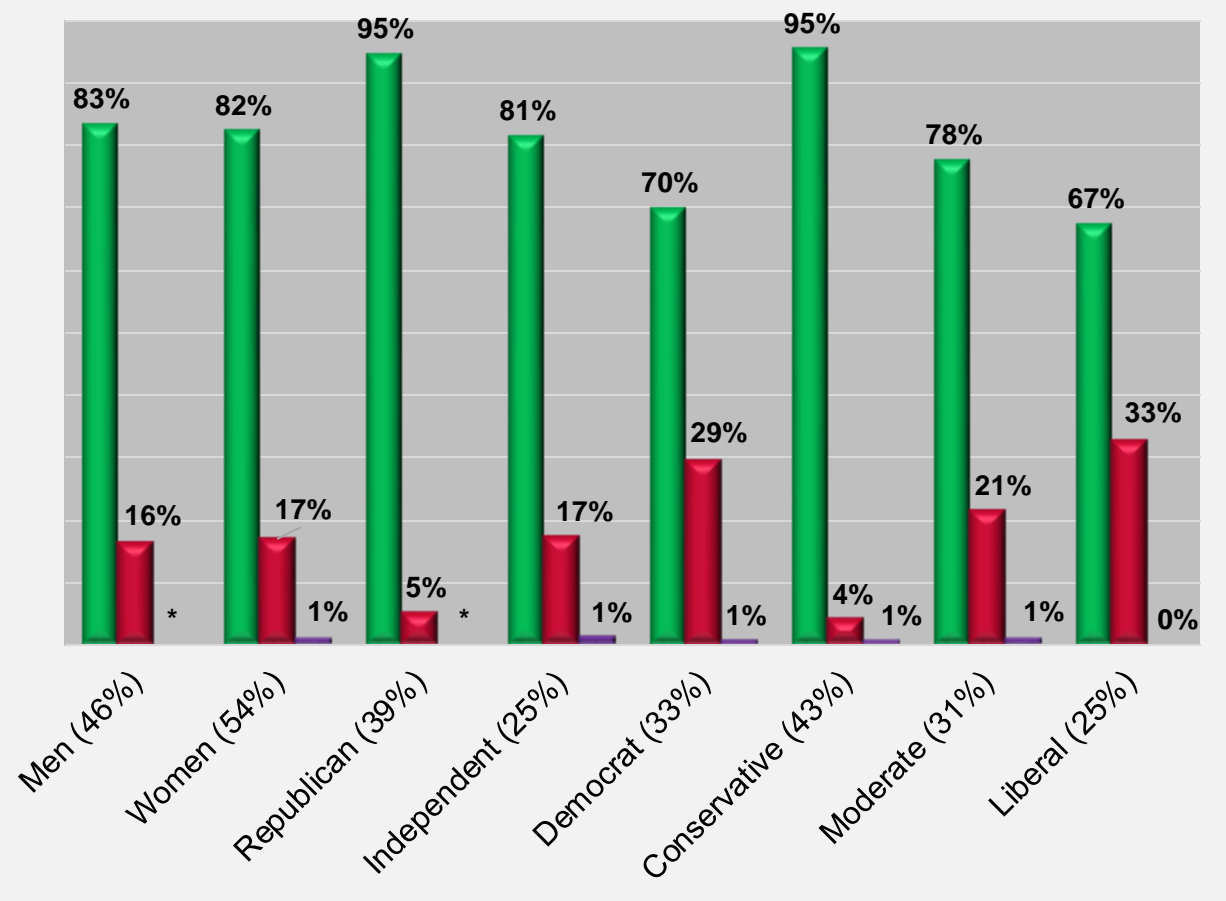

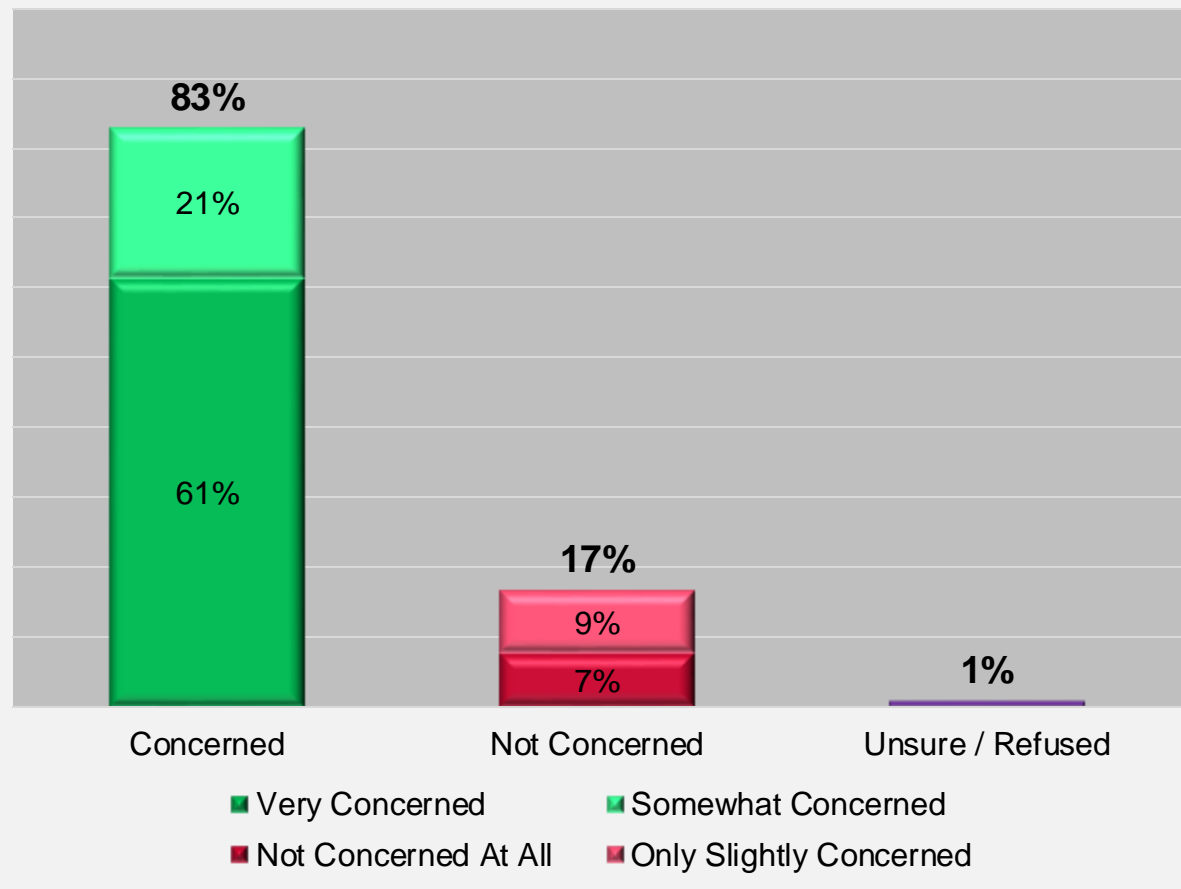

Margin of Error \pm 3.5%

Conducted by ProMark Research

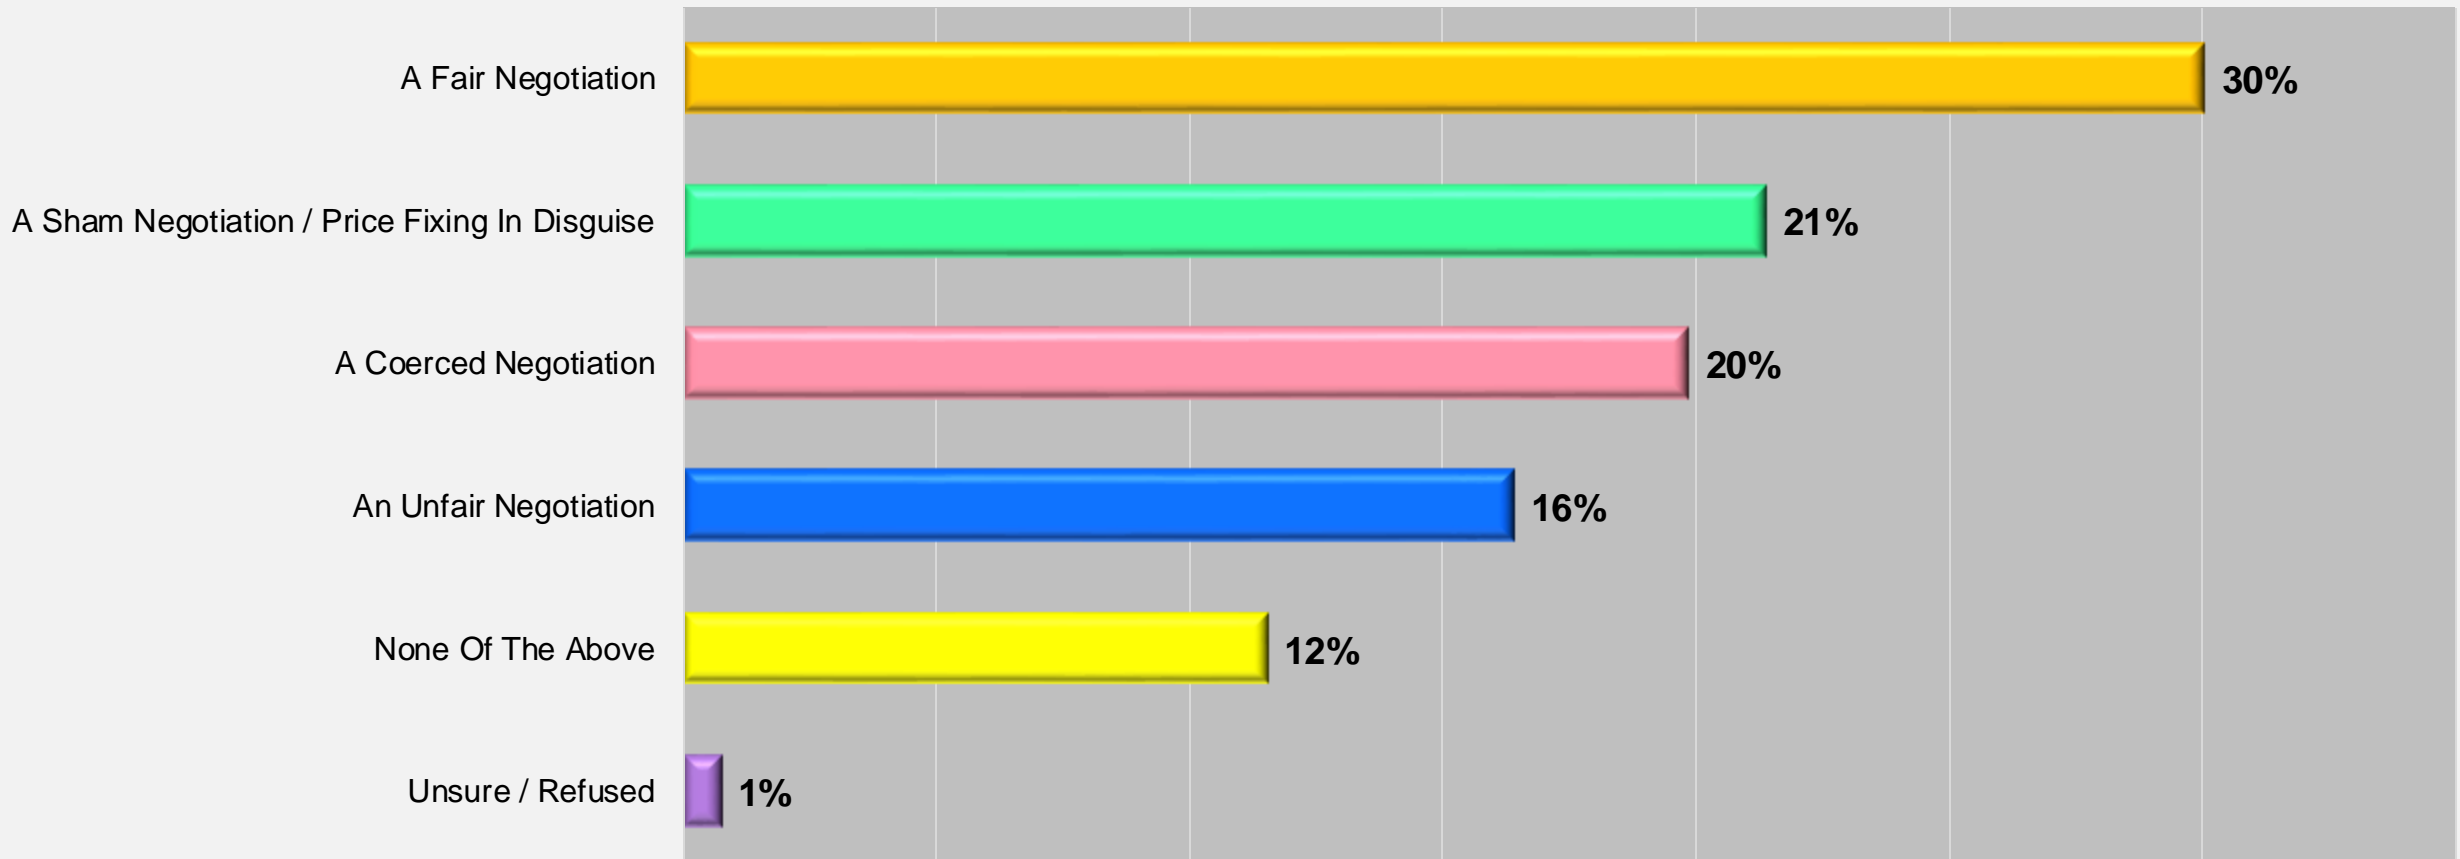

Methodology

- Survey among 800 registered voters nationwide ages 55+ (400 via telephone and 400 via panel) conducted December 9-16, 2024. Respondents were selected randomly from purchased sample and opt-in panel participants, respectively. Sampling controls were used to ensure that a proportional and representative number of respondents were interviewed from such demographic groups as gender, race, and geographic region.
 - Gender breakdown: 46% men – 54% women
 - Party ID breakdown: 39% Republican, 25% Independent, 33% Democrat
- $\pm 3.5\%$ overall margin of error at the 95% confidence interval for overall survey.

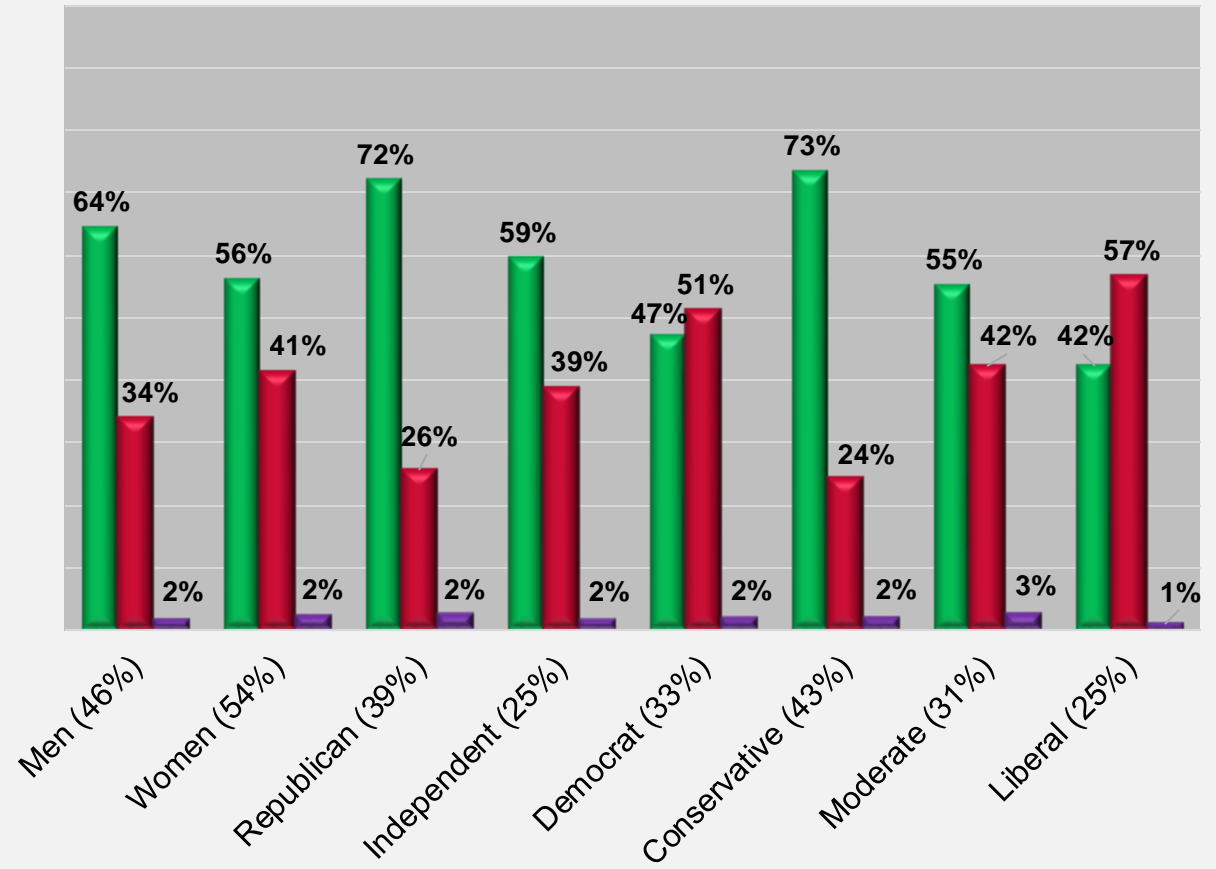

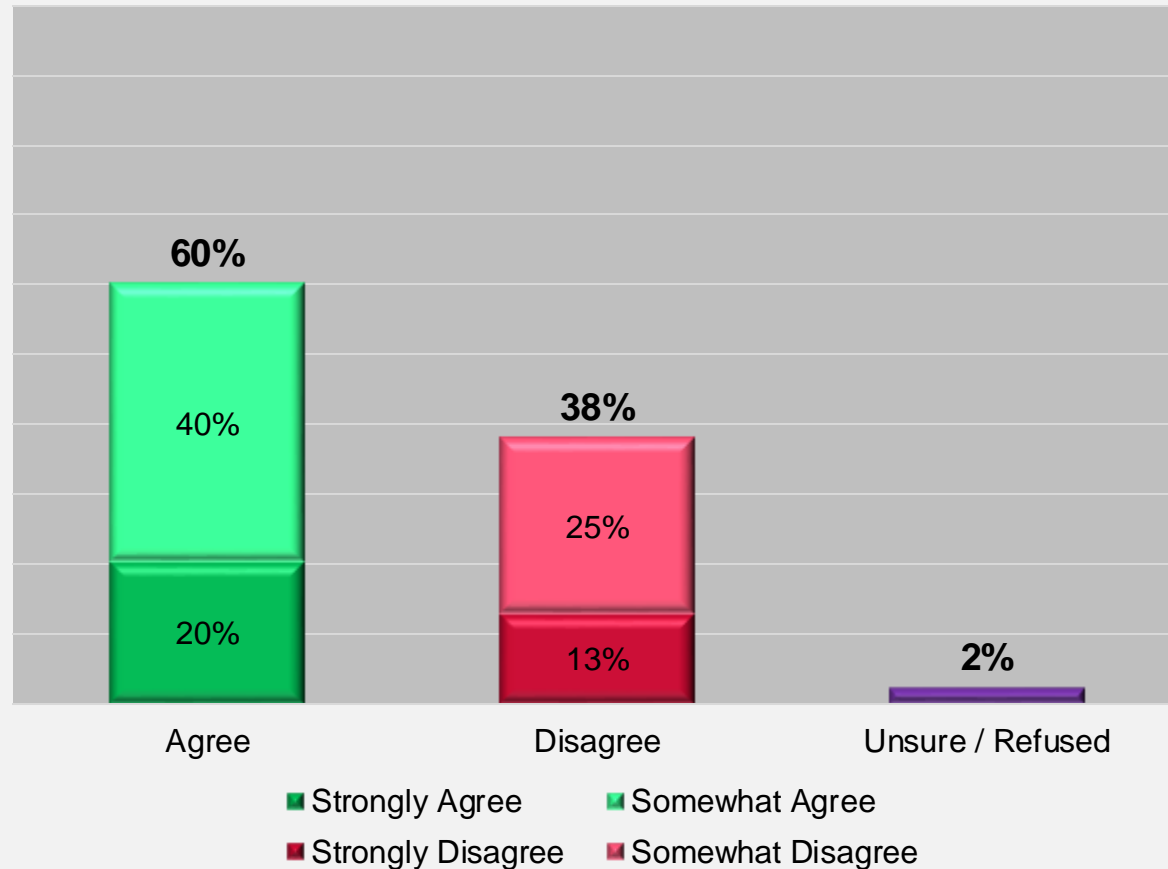

Analysis of the Inflation Reduction Act's green energy subsidies indicates these subsidies have only benefited a small number of green energy companies as well as wealthier Americans who buy electronic vehicles. How concerned are you that billions in taxpayer dollars are being directed at a small portion of the country that is generally more financially well off? Are you very concerned, somewhat concerned, only slightly concerned or not concerned at all?

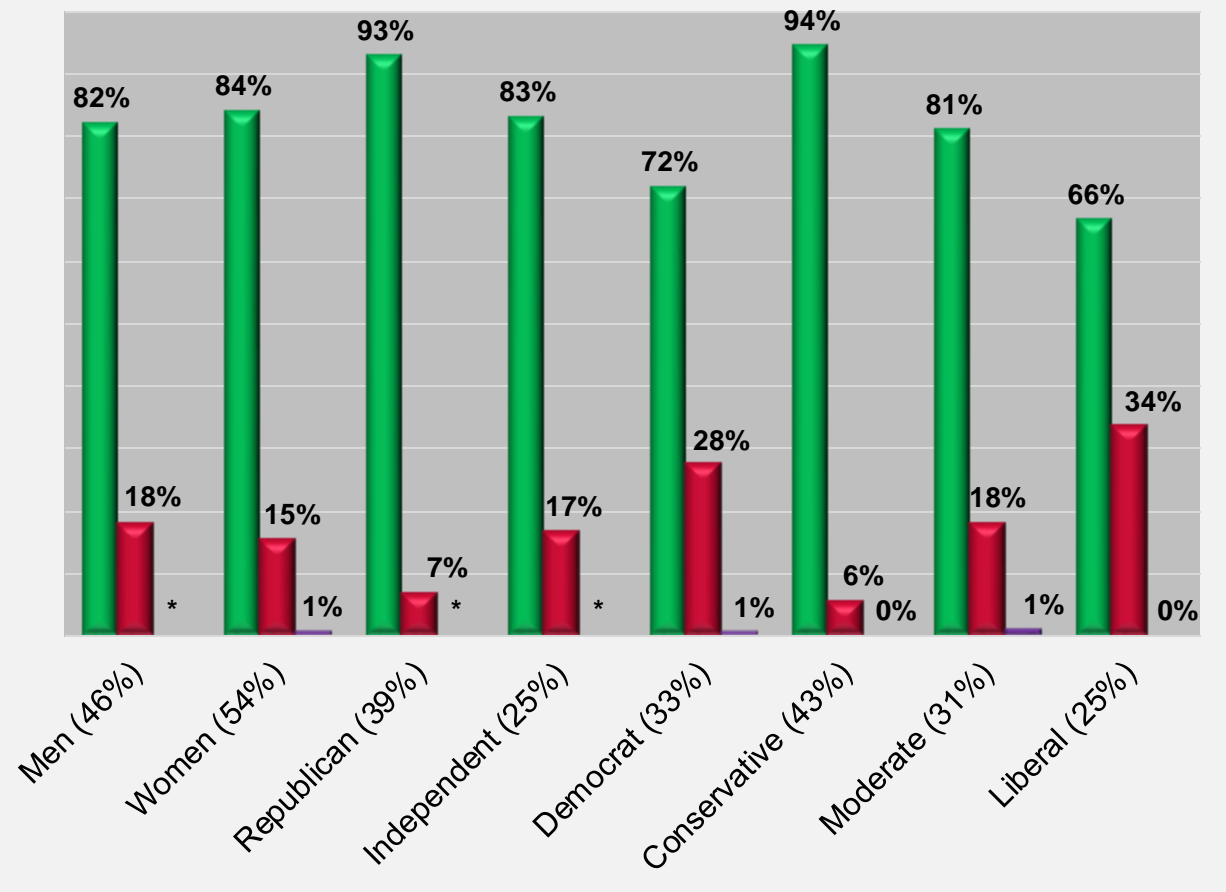

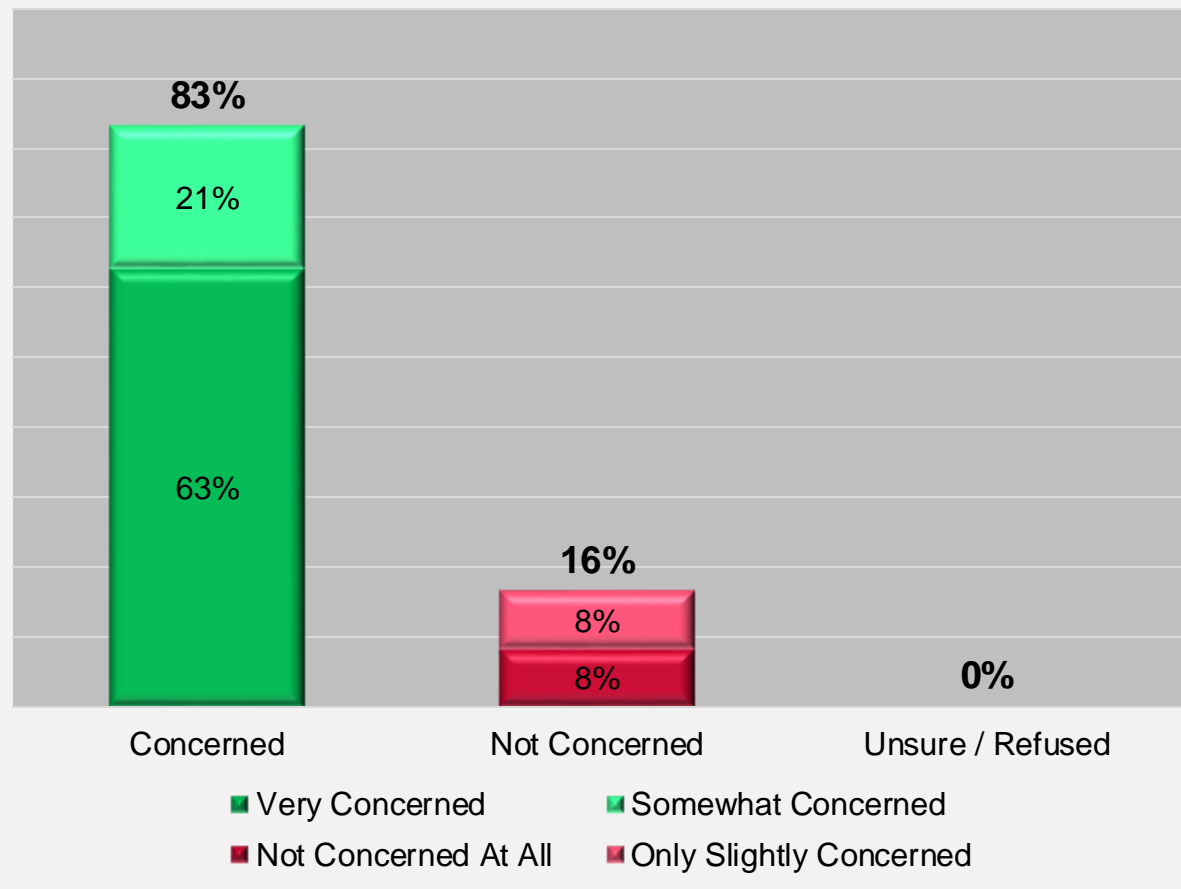

As a result of the Inflation Reduction Act, the federal government now establishes prices for a select group of drugs. There are large penalties for not joining the process, large penalties for not agreeing with the government's determined price, mandates to call the final offer price fair and the ability for the government to exclude all drugs a manufacturer sells to Medicare and Medicaid if the manufacturer rejects this process. Do you believe this constitutes a...

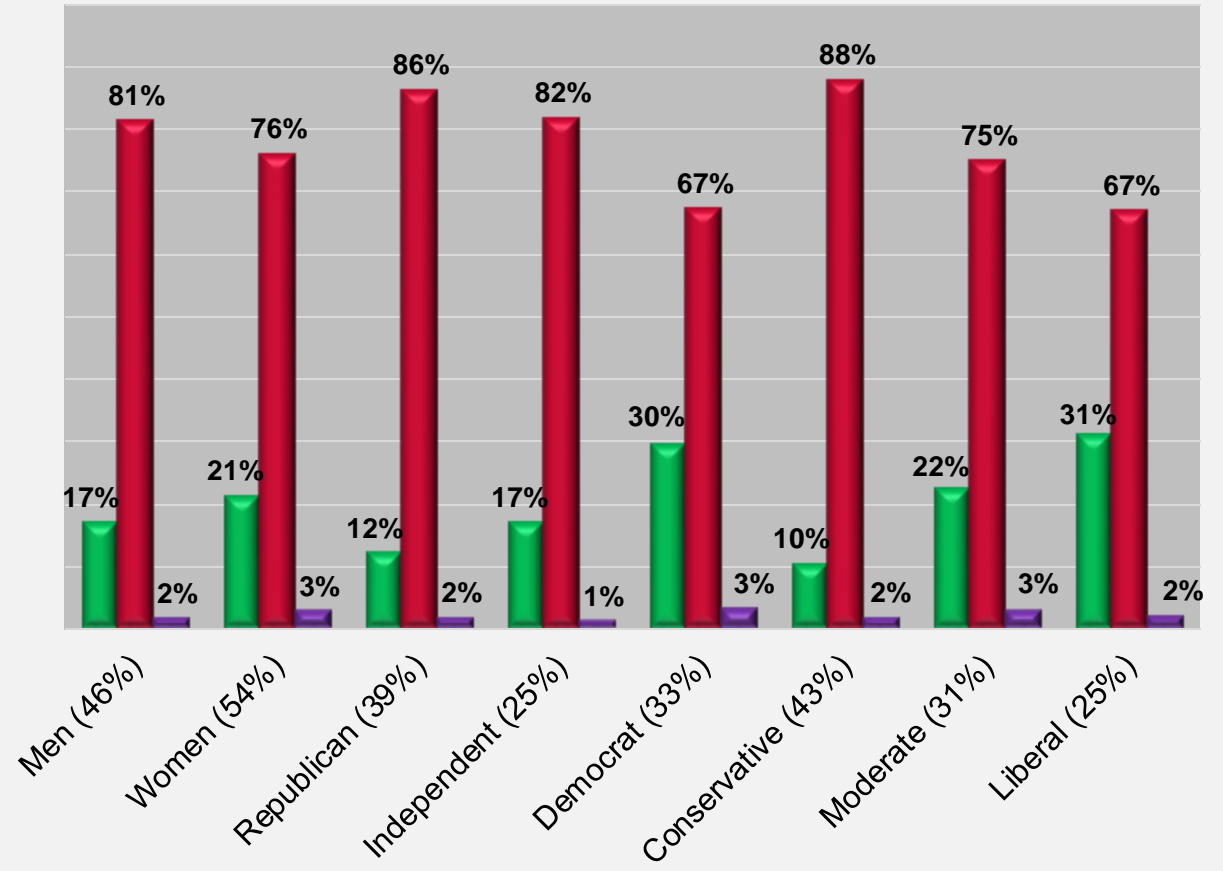

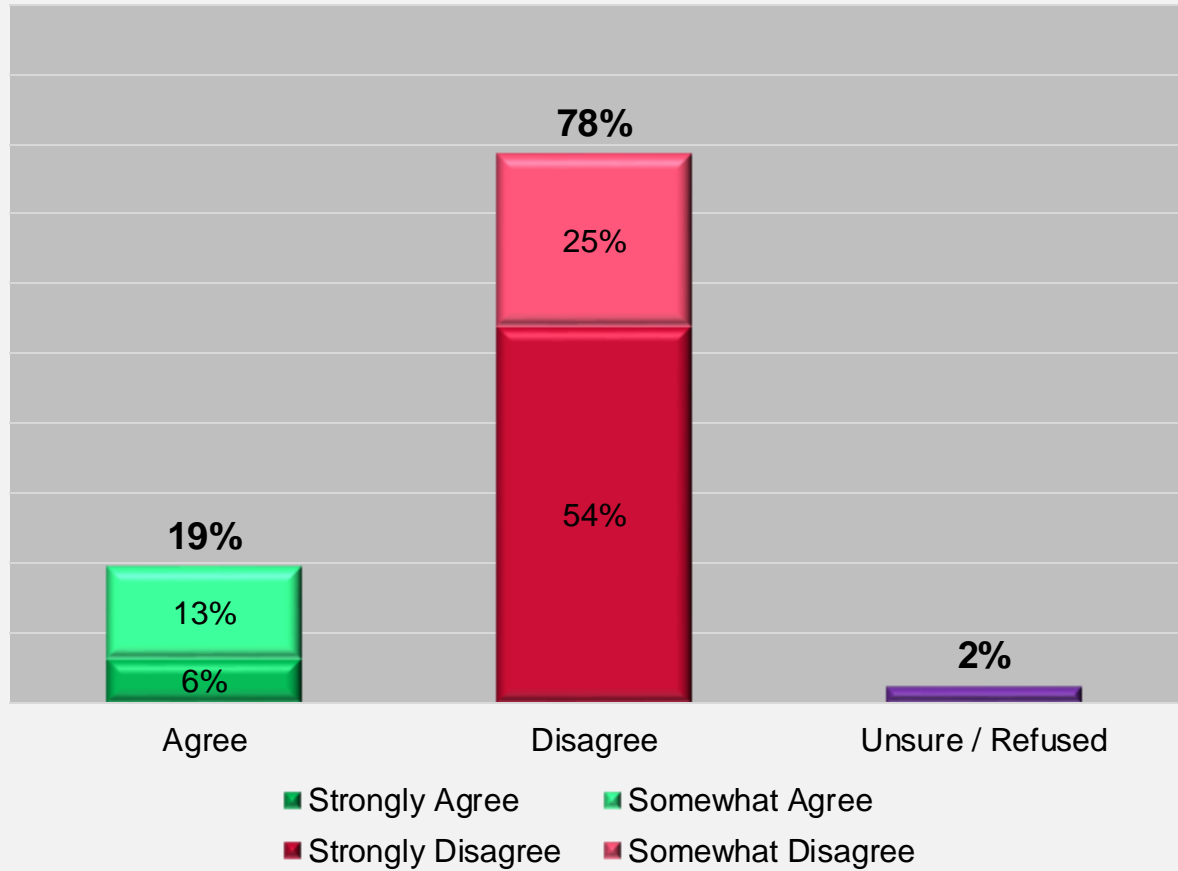

Would you agree or disagree with the proposition of eliminating the punitive taxes or financial penalties included in the Inflation Reduction Act's drug negotiation program to make the process more like a free market negotiation?

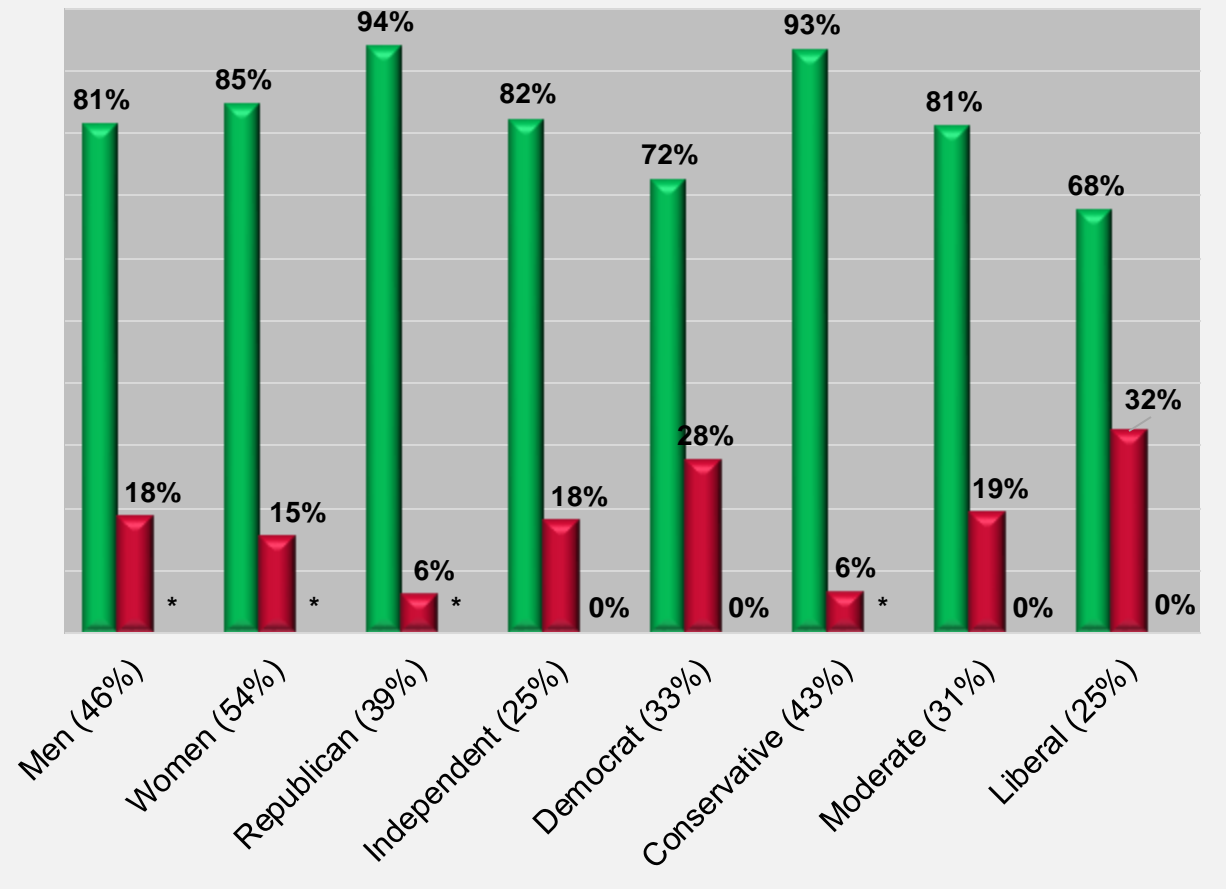

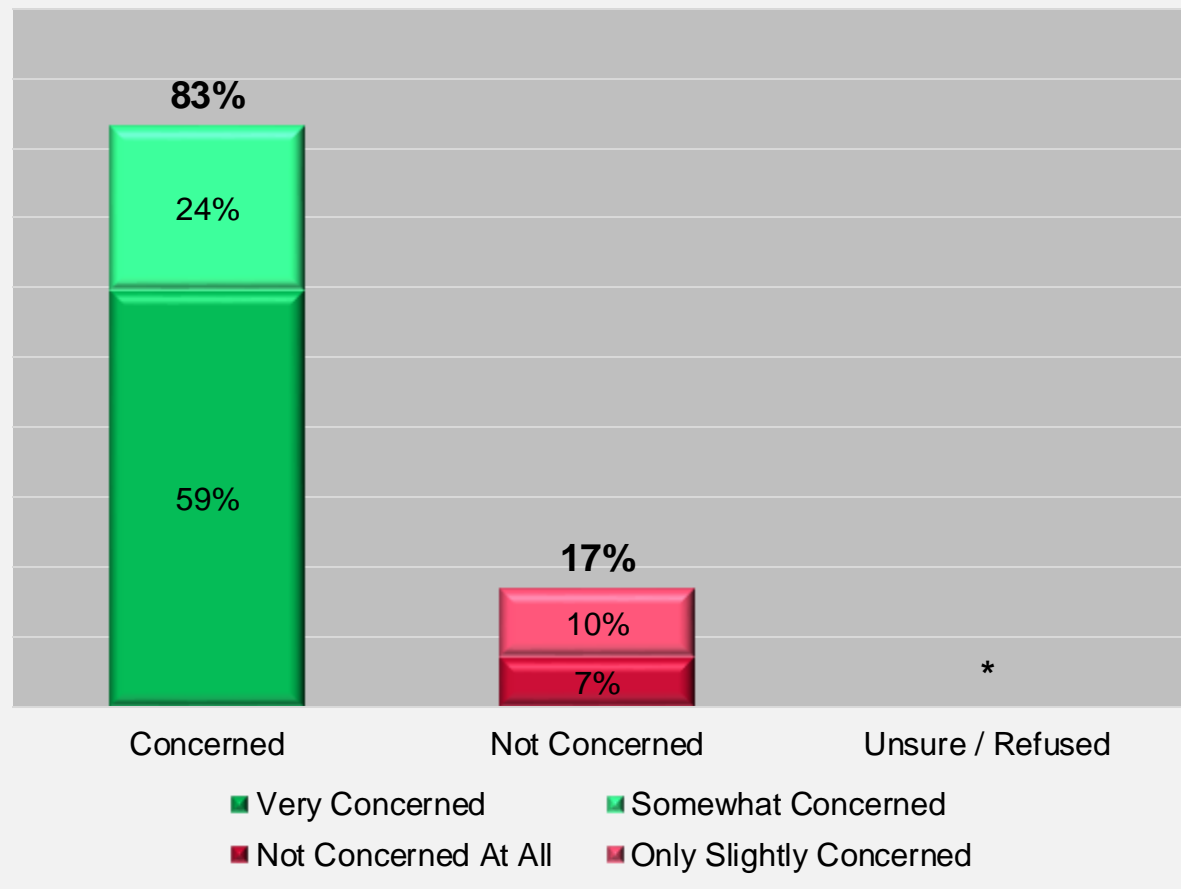

The Inflation Reduction Act made significant changes to the Medicare prescription drug coverage (Part D) program, causing premiums to go up by more than 400 percent over the course of two years. How concerned are you about the Inflation Reduction Act causing drug insurance premiums to go up dramatically? Are you very concerned, somewhat concerned, only slightly concerned or not at all concerned?

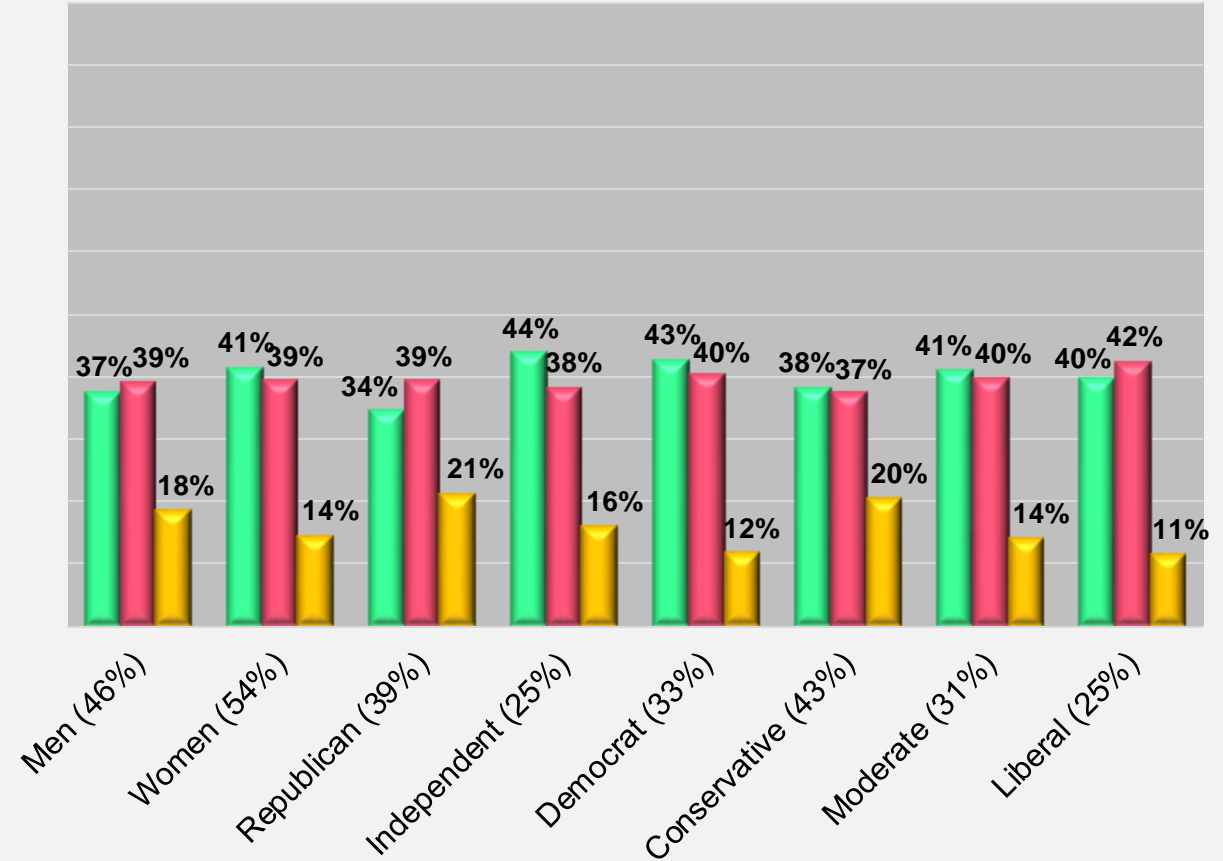

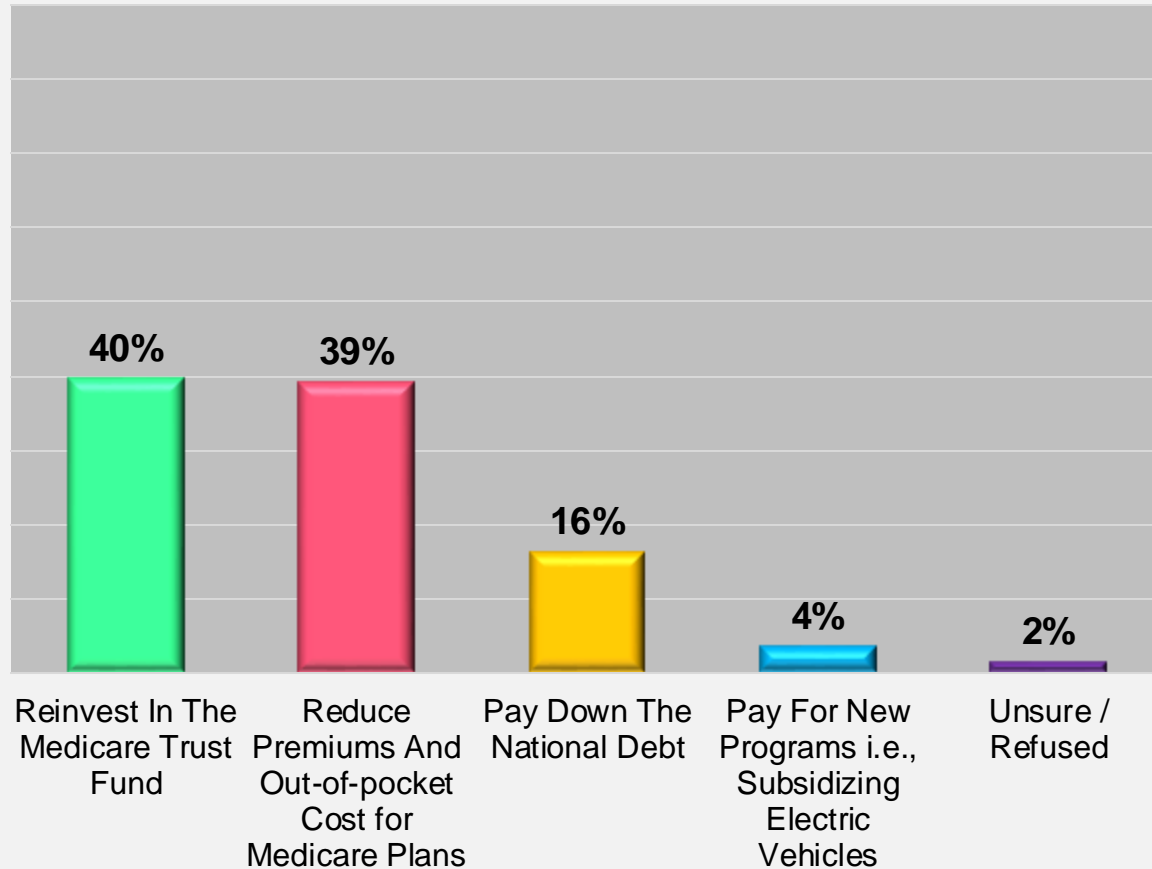

Do you agree or disagree with the government providing billions of dollars in subsidies each year to insurance companies because of the Inflation Reduction Act?

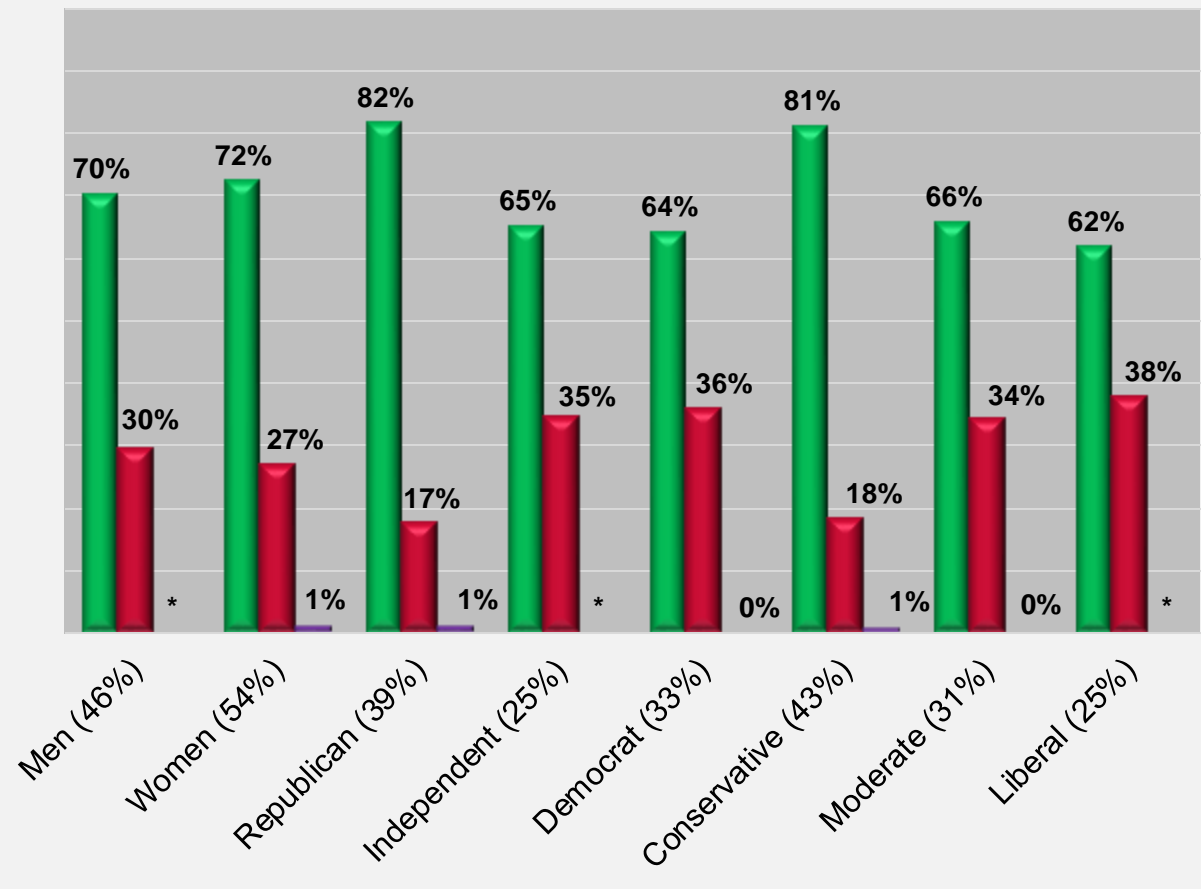

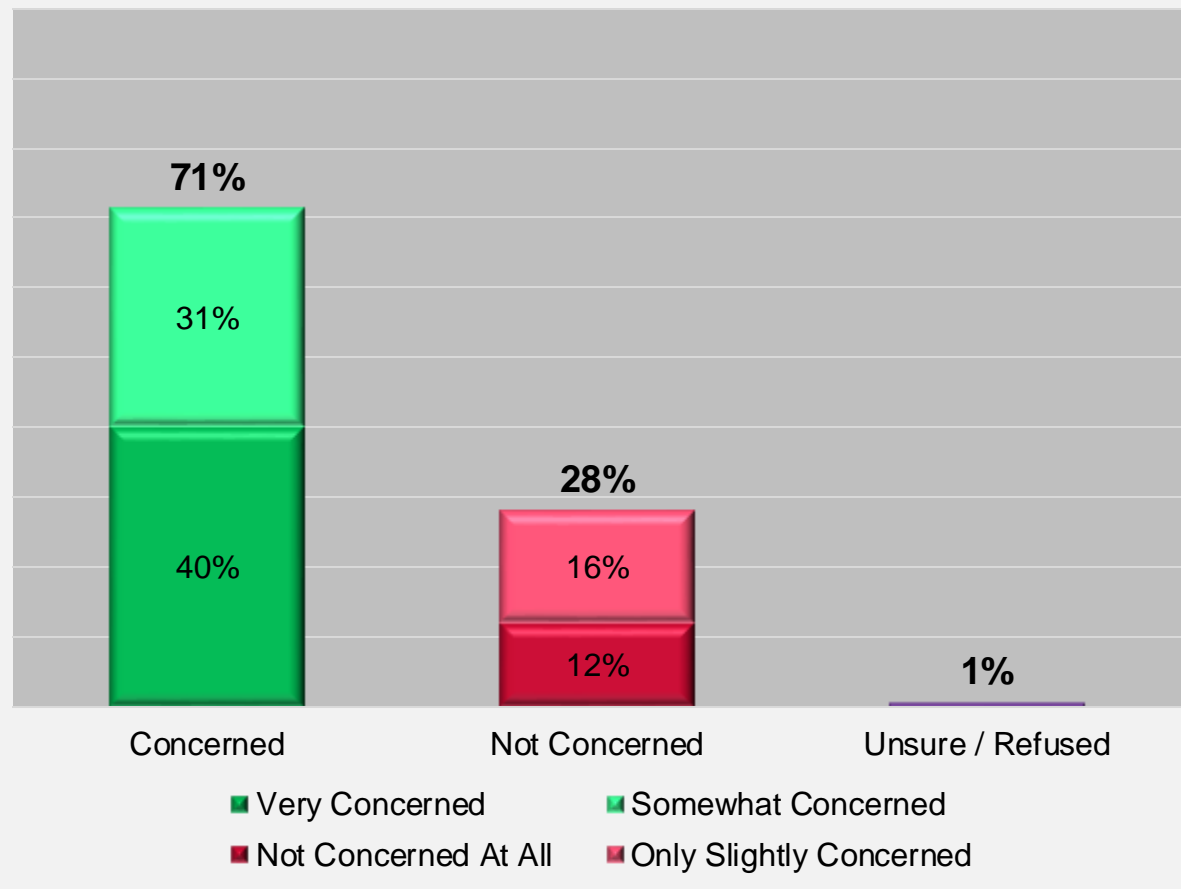

As a result of the Inflation Reduction Act, many insurers are fleeing the market due to the changes of the Medicare Part D. The number of plans for seniors to choose from declined 11 percent in 2024 and continue to fall by 26 percent in 2025, reaching the lowest number in the program's history. How concerned are you about the IRA reducing the choices that seniors have for prescription drug coverage? Are you very concerned, somewhat concerned, only slightly concerned or not concerned at all?

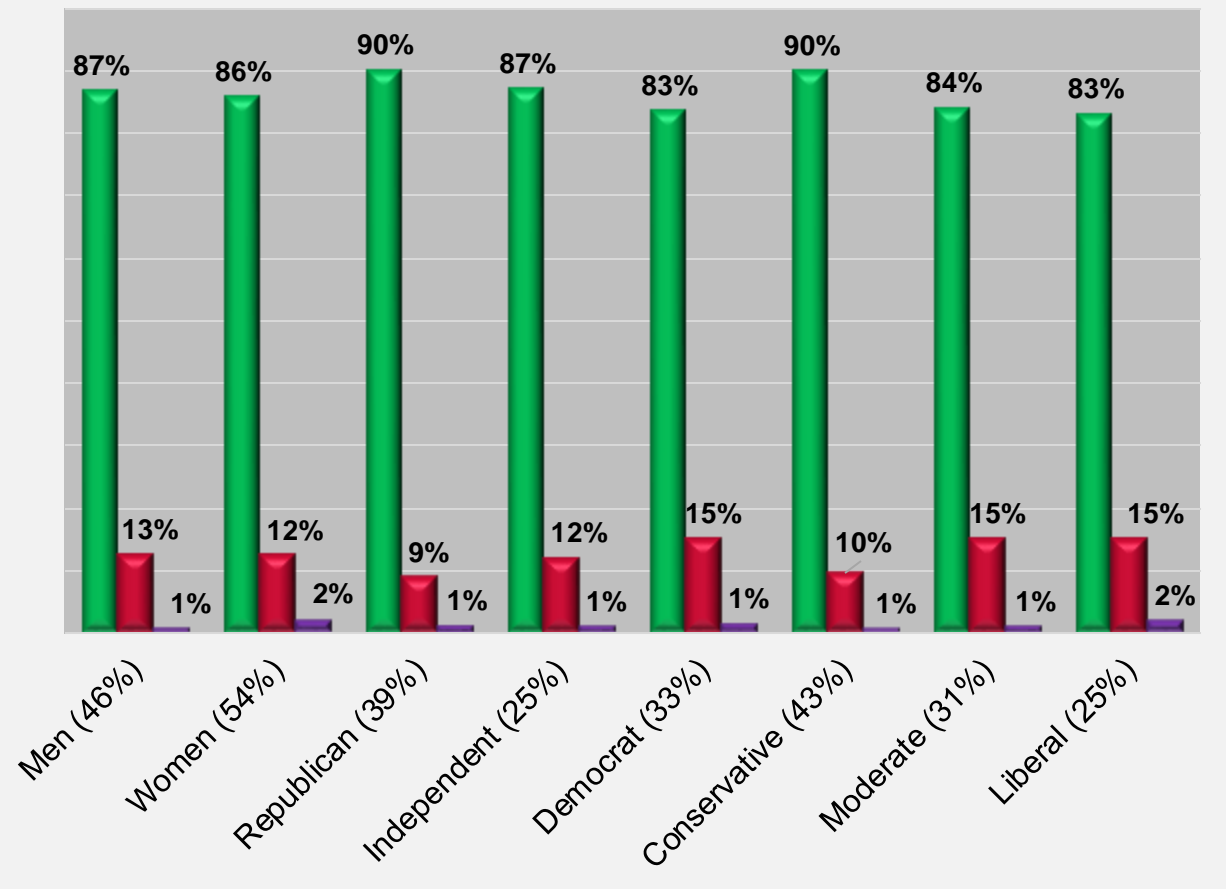

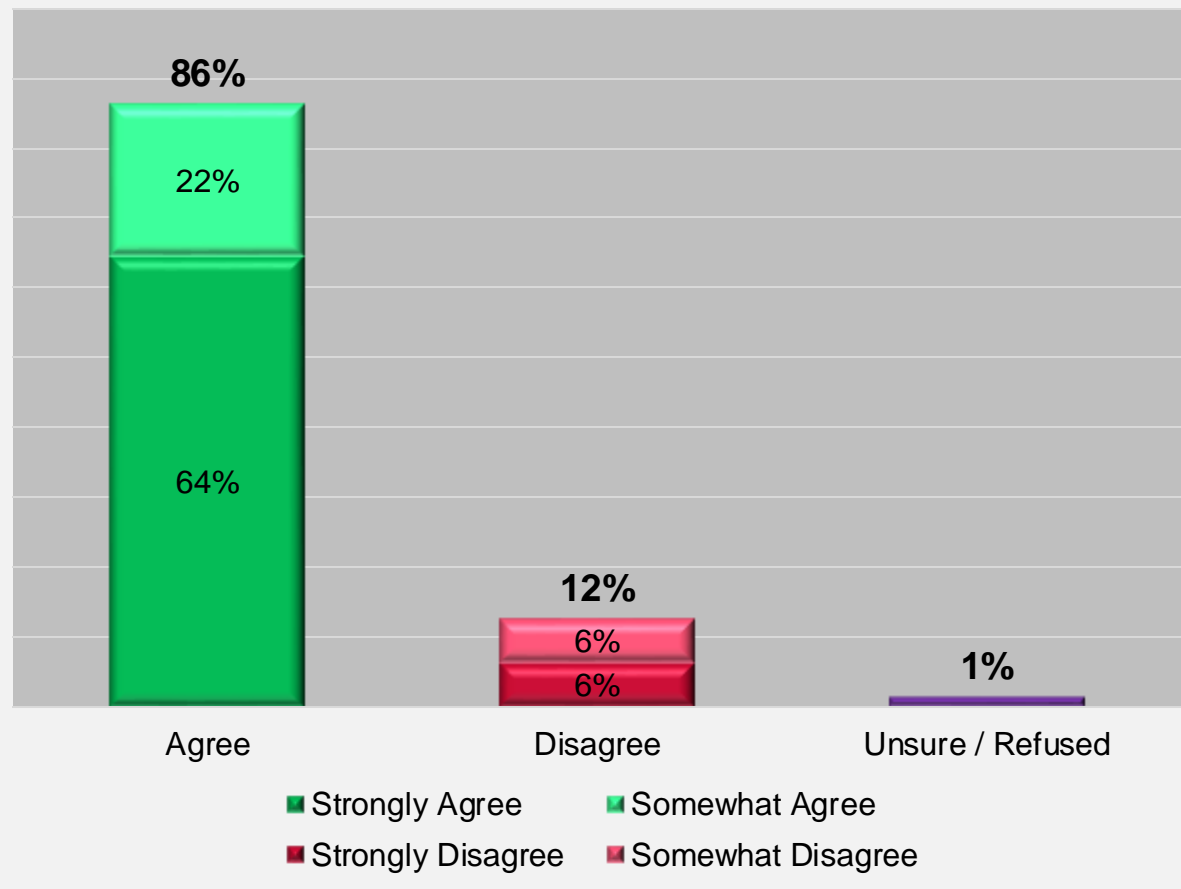

What should the government do with any money it saves from lower prices on drugs for Medicare recipients?

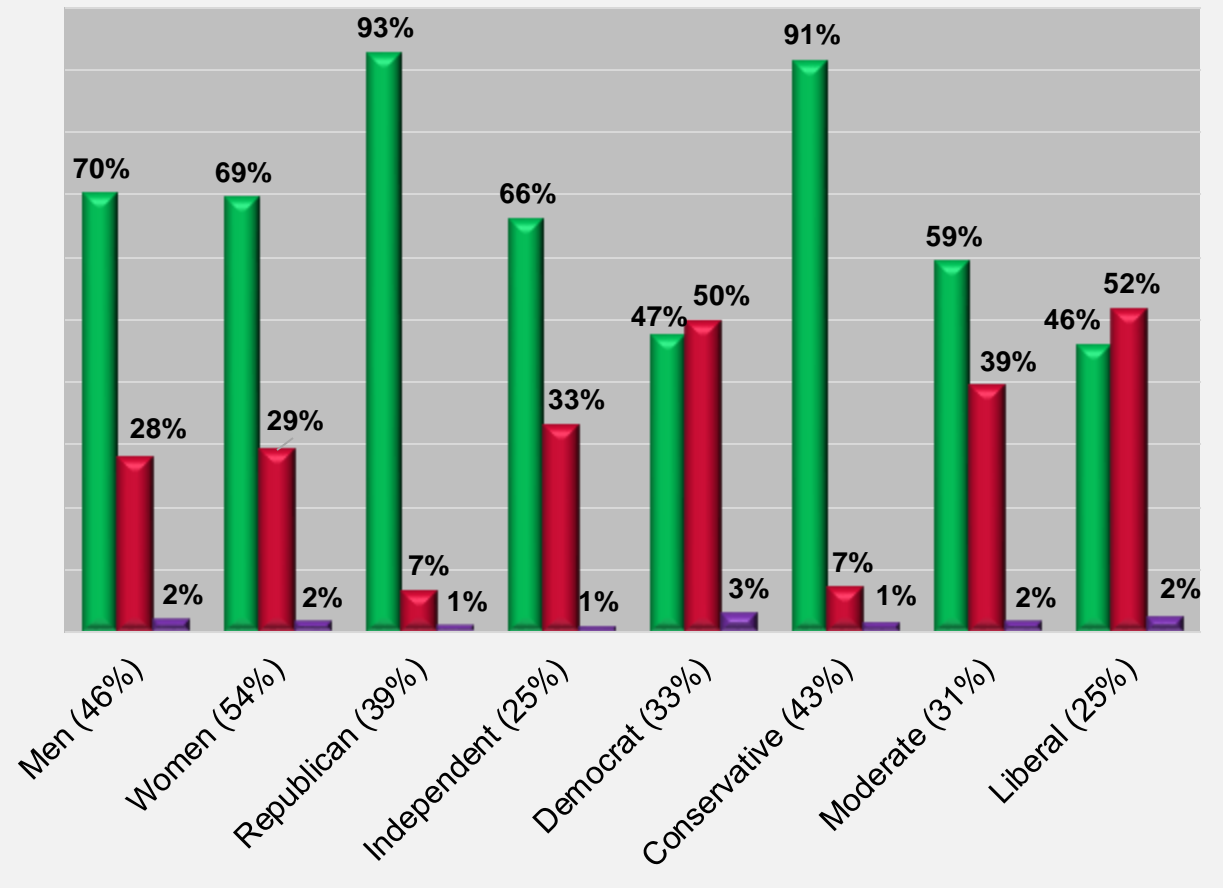

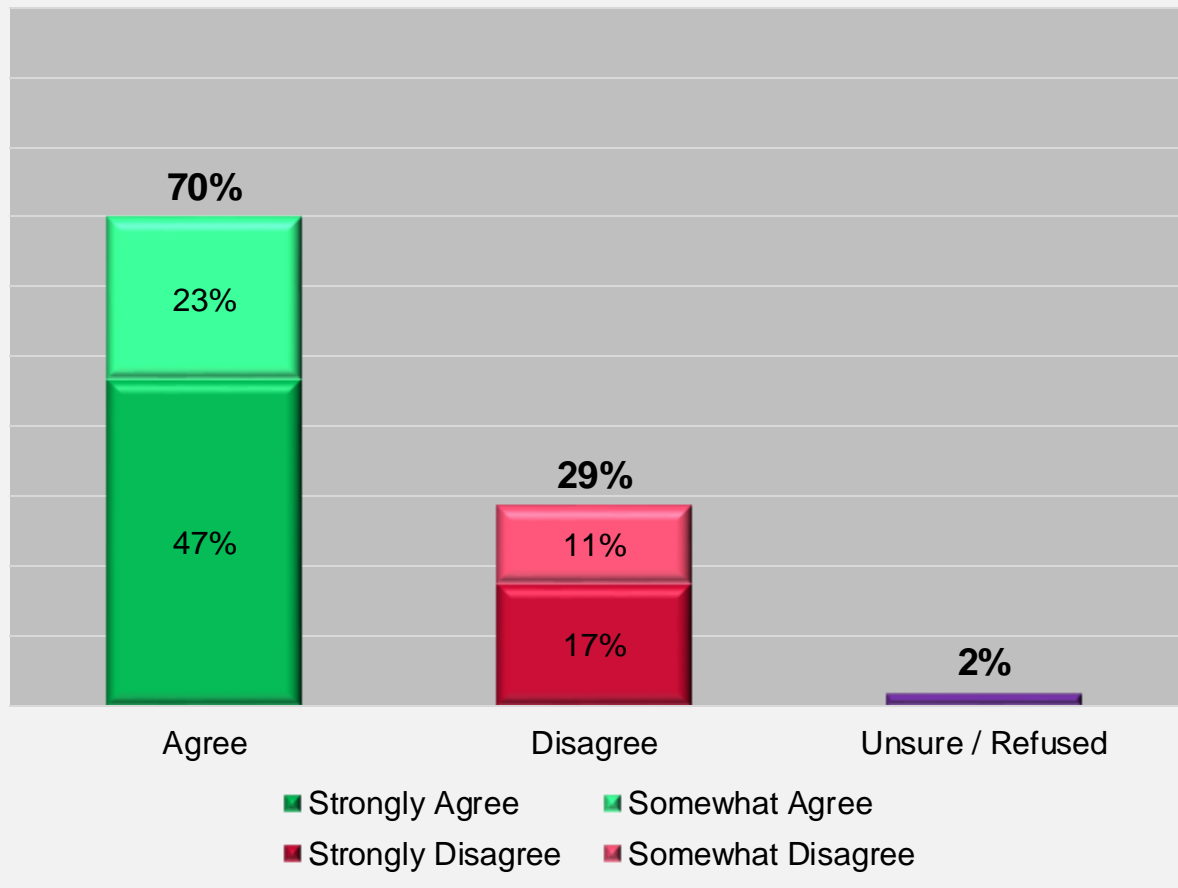

Since the Inflation Reduction Act's passage, research on new medicines has declined. A recent study indicated that Phase I and Phase II trials for new drugs declined nearly 36 percent after the law was passed. How concerned are you that, by setting prices on drugs, the government may be killing research that leads to better medicines and undiscovered cures? Are you very concerned, somewhat concerned, only slightly concerned or not concerned at all?

Independent pharmacies, which make up one third of all retail pharmacies in the United States, have warned that they may not cover any of the drugs negotiated under the Inflation Reduction Act's Drug Price Negotiation Program because the program negatively impacts how they are compensated. Do you agree or disagree that efforts to reduce the cost of drugs should not make it harder for seniors to get access to drugs?

Given the various concerns with the Inflation Reduction Act, including high costs, impact on research, reduced access to drugs and coverage options, etc., do you agree or disagree that the Trump Administration should pause or suspend executing the law until it can determine how to fix the law or repeal it entirely?

As designed, the Inflation Reduction Act diverts funds from Medicare to fund electric vehicle tax credits and other green energy initiatives. Given the major increase in costs and premiums in Medicare Part D since the Act was passed, would you agree or disagree with Congress taking money from the Inflation Reduction Act and returning it to Medicare to reduce costs to seniors?
